Myntra App logic

1.) Order Value Category:

1. input. 0 - 1000, small order 1000 - 3000, medium > 3000 large

2) if (orderAmount > 0 && OA ≤ 1000 → small order)

3) else if (orderAmount > 1000 && OA ≤ 3000) → medium.

4) else high order.

---

2) Product stock check.

1) input input available = 10 → available input == 0. → not available

2) take a product and if(input > 0) → product available

3) else not available

3) Free Delivery check.

1) input input > 1000 free deliv < 1000 Deliver charges apply

2) total bill () → if (orderAmount > 1000) → free deliv

3) else (orderAmount < 1000) → orderAmount + deliv charges

4) total Amount (output)

---

4) Product Rating Level.

1) input value 0 ≤ 5 value.

2) if (rating (input) > 4) → Excellent Prod

3) else if (rating < 4 && rating ≥ 3) → Average

4) else (poor).

---

5. Return Policy Check.

1. Input. days $0 \le 30$. 0-7 → return ✓ ; >7 → not allow.

2) if (daysAD > 0 && daysAD ≤ 7) → allowed.

3) else if (daysAD > 7) → not allowed.

4) show allowed (or) not allowed.

6) Cart item Limit

1. input $0 \le$ cartItem ≤ 20. input value.

2) if (cartItems > 0 && cartItems < 5) → Items Added to cart.

3) else (·) → Cart Limit Reached

4) output Reached (or) added

7. Wishlist Limit.

1. input range $0 \le 1000$. 0-30 → add ; 30-70 → limit reach

2) if (wishlistItem > 0 && wishlist <= 30) → add to.

3) else (·) → Limit reached

4) output → limit (or) added

8. Discount check.

1. input discount $1 \le$ purchAm ≥ 100000 0-1000 → no dis ; 1000>5000 15%. 5,000>5000 30%. 50,000/10,000 (50%)

2) if (purchAmo ≤ 1000) → No disco

3) else if (PurchAm ≥ 1000 & ≤ 10,000) → 15%.

4) else (pur >) → 25%.

9. Delivery Type:

1) strings (input)

2) char if (city == metropolitan) → express deliver

3) else (normal delivery).

4) output express & normal.

10. User Login Check.

~~Pass~~ 1) input. username ≤ 20 (characters),
password ≤ 20 (characters).

2) if (username = userm, pass == pass) → login

3) else fail!

4) output login ~~or~~ fail.
